Summary

Motivated B.Tech student with strong interest in full-stack web development. Skilled in building modern web applications using React, Next.js, Node.js, and MongoDB. Experienced in developing responsive user interfaces, backend APIs, and database-driven applications through internships and personal projects. Passionate about creating scalable applications and continuously improving technical skills.

Experience

Prodigy InfoTech — Remote
Full-Stack Web Development Internship — 02/2026

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Assisted in backend development and API integration for dynamic web applications.
- Implemented authentication workflows and improved application functionality.
- Gained experience using Git and collaborative development practices.

Skills

Programming Languages: Python · JavaScript

Frontend Development: HTML · CSS · React · Next.js

Backend Development: Node.js · Express.js

Databases: MongoDB

Tools: Git · GitHub · VS Code

Training / Courses

Vocational Training – Web Development Infynas Learning Solutions | Aug 2025

Web Developer Internship Course Codec Technologies | Apr 2025

Education

RITEE Group of Institutes — 2023 - 2027
Bachelor of Technology (B.Tech)

Projects

URL Shortener – Web Application
Tech: Next.js, Node.js, MongoDB

- Developed a web application that converts long URLs into shortened links.
- Implemented custom short URL generation functionality.
- Designed backend logic to store URLs and manage redirection.
- Integrated MongoDB database for persistent link storage.

CivicIndia – Civic Issue Reporting Platform (In Development)
Tech: Next.js, Node.js, Express.js, MongoDB

- Developing a platform for citizens to report civic issues like potholes, garbage, and water leakage.
- Implementing features for submitting issue descriptions and location details.
- Designing backend APIs for managing reports using MongoDB.
